

Growth Mindsets for All

Why do some children persist when faced with challenges, but others give up?

This workshop examines student motivation and achievement, how this relates to beliefs students hold about themselves and the nature of their ability and how this interacts with teachers beliefs about ability. Find out ways of changing a 'can't do' attitude to a 'can do' one.

The workshop will:

- Equip you with a good understanding of the rationale and research evidence from behind two contrasting pupils mindsets
- Explore practical strategies, tools, and resources which will enable you to develop growth mindsets amongst pupils, encouraging them to persist when facing challenge
- Explore activities that help teachers and TAs develop their own growth mindsets and model such attitudes for pupils
- Support you in planning how to change things back in school

This workshop is designed for:

Primary and Secondary teachers. NB We very much welcome Learning and Skills Sector colleagues but are also hoping to run a sector specific version of this workshop later in the year.

You will learn to:

- Identify mindsets embedded in current pupil thinking and classroom responses
- Use oral and written feedback to promote growth mindsets
- Plan for differing levels of challenge
- Provide learning opportunities to support a growth mindset amongst staff

The CUREE guarantee

Our facilitators will:

- Make high leverage research and evidence accessible and useful focusing on high leverage strategies
- Provide tools to sustain learning and help colleagues refine strategies in the light of pupil responses
- Introduce learning in a way that is active, engaging and helps with the collection of evidence about staff learning to support the evaluation of impact
